6. Power consumption is calculated in accordance with Regulation (EU) 2017-1151.

7. The WLTP range and consumption values are obtained under standard EU test conditions, according to the uniform provisions concerning the approval of motor vehicles with regard to the emissions based on the new World Harmonized Light Vehicle Test Procedure (WLTP). The actual range and energy consumption figures may vary due to a number of factors such as weather conditions, traffic situation, vehicle load and driving behaviours.

8. Charging times and charging speed may vary due to different factors such as battery temperature, specs of charging infrastructure, state of charge.

9. For the Active version, the AC charging power can up to 3.3kW while the actual charging power might be limited at low SOC; For the Boost version, the AC charging power can up to 6.6kW while the actual charging power might be limited at low SOC.
